

## POSTLAB #8 - CSE 1310

Q1.(10 points) Write a do-while loop that repeatedly prompts for and takes input until a value in the range 0 through 15 inclusive is input. Include code that prevents the loop from cycling indefinitely on input of a wrong data type.

Q2.(15 points) Write nests of loops that cause the following output to be displayed:

```
0
0 1
0 1 2
0 1 2 3
0 1 2 3 4
0 1 2 3
0 1 2
0 1
0
```

### **Deliverables:**

1. E-mail the answers to all the questions to your lab instructor:

### **Sending E-Mail:**

You can use Pine to send the e-mail. First, type answers to all questions in a file using 'vi' or 'pico'. Attach this file with the e-mail and make the "Subject of message:"

POSTLAB #8. Remember to send a copy to yourself just in case your instructor does not receive your message.
