Komodo-WebApp by Vaibhav Murkute: (Category: Utility app for Blockchain)

Email: vaibhav.murkute@mavs.uta.edu
Blockchain: Komodo

Features:
- This tool can be used as an Online wallet for a Komodo-based asset-chains.
- Major functionalities:
  - Create a new chain
  - Connect to existing chain on the server
  - Get wallet information
  - Get network information
  - Send coins to address
  - Add new nodes to this chain
  - List address groupings
  - Issue a new wallet address
  - Enable mining on this instance
  - Get transaction details
  - Remotely Stop the chain
Rank #2

**BlockRedit** by Mohammad Ali: (Category: Utility Application for Blockchain)

**Email:** ali.mohamedi2@mavs.uta.edu

**Blockchain:** Komodo

![Dashboard](image)

**Features:**

- Users can use this app to convert cash to crypto-coins. (For cash, it has to be linked to bank account).
- This project can be extended to create a Payment Gateway or Coin conversion portal to exchange various coins, (like atomic swaps in Komodo).

**Crypto-Rock-Paper-Scissor** by Lalit Jayavantt Goski

**Email:** lalitjayavantt.goski@mavs.uta.edu

**Blockchain:** Komodo

---

**CRYPTO-RPS: ROCK, PAPER, SCISSORS!**

Submit your name and wallet address to begin the game. Select either rock, paper, or scissors when prompted. Your opponent will do the same. Rock beats scissors, scissors beats paper, and paper beats rock. Good luck, and have fun!

Submit

---

**Features:**

- Players can chat with each other
- Winner will be awarded coins
- Players cannot see each other’s screen.
- A player can withdraw refund or wait more to get an opponent.
Rank #2

**Hangman** by Binaya Khadka: (Category: Trivia Game with Blockchain)

Email: [binaya.khadka@mavs.uta.edu](mailto:binaya.khadka@mavs.uta.edu)

**Blockchain:** Komodo

---

**Features:**

- A trivia game where player needs to guess Movie name or Movie Dialogues or Songs. If players make certain number of mistakes while guessing, they lose.
- Winner gets the winning reward (coins).
- Good GUI, need to work on chain-integration
Rank #3

**Connect 4-Komodo** by Sidharth Raj

**Email:** [sidharth.raj@mavs.uta.edu](mailto:sidharth.raj@mavs.uta.edu)

**Blockchain:** Komodo

---

**Features:**

- Connect4 game with AI
- Competitive match with AI
- Transaction using WALRUSCOIN Komodo Chain.

**ParkChain** by Roopam Sharma

**Email:** roopam.sharma@mavs.uta.edu

**Blockchain:** Komodo
Features:

- People can park in parking spots and pay by using bitcoins
- Transaction Id Validation (Parking reservation successful only if valid transaction Id is provided)
- New address can be generated each time generate button is clicked for sending money.
- QR code generated for the Mobile Apps
- People can receive sign up bonus while registration.
- Parking history is maintained.
- Users can register, login and logout from system
Features:

- The combination of IoT and Blockchain will effectively reduce the friction in Supply Chain Management mainly eliminating central third-party entities.
- Currently, simple transactions involved in industries with multiple clients/vendors have lengthy procedures. These can be automated using Smart Contracts and distributed ledgers. The contracts can be recorded publicly for reliability.
- End-2-End visibility across multiple clients in supply chains is possible. Blockchain based framework will ensure that all the involved parties/clients can access the data in real-time.
- It is also possible to capture the information or data that is received from IoT devices such time, location, etc. to further complement data integrity and security.
